

TESTIMONIAL FOR HUMPHREY HOMES

I considered lots of different options for designing and building my home, including independent architects, but was attracted to the idea of having an architect and builder in the same company working together from the start of the project and Humphrey Homes seemed the obvious choice.

When I met with Helen I felt like she immediately understood what I was trying to achieve and was able to translate these ideas to a great design which really suits my lifestyle and works on the block.

Likewise, Joie and Katie have been brilliant at taking my ideas for the interior design and coming up with great options which made the process of choosing materials and fittings enjoyable, rather than overwhelming.

The build process has been very smooth, particularly considering the challenges that the pandemic has created. Communication from the team has been great throughout the project and the quality of workmanship is exceptional.

I am thrilled with the result and can't wait to move in.
